MONTREAL

"I highly recommend OSP to any business that has MISSION-CRITICAL systems."

ONE MONTH after we installed OSP, our hotel PMS server completely shut down due to hardware failure.

We were UP AND RUNNING WITHIN 30 MINUTES with little disruption to our operations.

More importantly, we continued to run on the OSP device for 3 WEEKS as our server was a total loss and needed to be replaced from scratch.

Our OSP virtual backup ran flawlessly for the entire time and has proven it's worth a THOUSANDFOLD.

"Without hesitation, I recommend OSP as the MUST-HAVE solution for any business that cannot afford any downtime."

Domenic De Angelis
Director of Finance
INTERCONTINENTAL MONTREAL 357 Rooms

CHICAGO MAGNIFICENT MILE

Our OPERA Server completely shut down due to the failure of our Smart Array Controller. It would take us a few days to get a new controller.

With the OSP backup solution, it helped us to bring a 700 GB OPERA Server backup on a virtual machine within 2 hours.

This is the fastest backup and recovery solution that I have used so far.

With Incremental backup every hour, we could get the most recent live database.

We ran OPERA Server on virtual machine for a week and restored back on the same server flawlessly.

"I highly recommend OSP as the MUST-HAVE solution for any business."
